TECHNICAL EDUCATION & SKILLS DEVELOPMENT FRAMEWORK

Module 2: Working in a Team Environment

Unit Code: 500311106 **Nominal Duration:** 1.0 Hour **Level:** Basic Competency

1. UNIT DESCRIPTOR & LEARNING OUTCOMES

This module covers the competencies, procedural awareness, and collaborative attitudes required to relate and perform effectively within an enterprise team setting. Trainees are taught to recognize shared organizational objectives, clarify individual responsibilities, support colleagues, and utilize standard reporting chains.

Learning Outcome 1 (LO1)
Describe and identify team roles, operational scopes, mutual responsibilities, reporting hierarchies, and workplace Standard Operating Procedures (SOPs).

Learning Outcome 2 (LO2)
Function collaboratively as a proactive team member, contributing to group planning, mutual support, joint decision-making, and collective goals.

2. COLLABORATIVE TEAM WORKFLOW ARCHITECTURE

3. PERFORMANCE CRITERIA MATRIX: ROLES & RESPONSIBILITIES (LO1)

Assessment Element	Performance Standards & Indicators	Assessment Method
Objective Identification	Team roles, collective objectives, operational parameters, and project scopes are accurately recognized from enterprise directives.	Written examination & Observation
Individual Contribution	Individual responsibilities within the group environment are clearly distinguished from peer roles to prevent duty overlap.	Case analysis & Interview
Reporting Hierarchy	Internal and external reporting relationships, escalation protocols, and team leadership structures are correctly mapped.	Workplace simulation test

4. TECHNICAL EXECUTION: TEAMWORK DYNAMICS (LO2)

Effective teamwork requires active engagement, transparent coordination, and alignment with workplace Standard Operating Procedures (SOPs). Trainees must balance personal task performance with collective support mechanisms during complex laboratory workflows.

Competency Focus	Procedural Action Required	Operational Output
Communication Forms	Utilize formal shift handovers, digital collaboration channels, and respectful oral interaction.	Structured team update log
Complementary Support	Assist peers during operational bottlenecks without abandoning designated personal duties.	Peer assistance record
SOP Adherence	Transmit reports through standard administrative templates and designated operational chains.	Standard incident & progress report
Work Plan Contribution	Participate actively in setting timelines, allocating tasks, and defining milestone checkpoints.	Shared team work schedule

5. PRACTICAL LABORATORY ACTIVITY: COMPUTER LAB SETUP SIMULATION

Group Scenario: A team of 3 trainees is tasked with setting up, cabling, and configuring 6 computer lab workstations for a certification exam within a 45-minute window following laboratory SOPs.

TEAM ROLE ALLOCATION & EXECUTION MATRIX

Member A (Hardware Lead): Positions monitors, CPUs, peripherals, and securely connects all cabling.

Member B (Network & Power): Verifies power strips, inspects LAN connectivity, and audits IP assignments.

Member C (QA & Reporting): Boots test software, logs serial numbers, and submits final sign-off report to instructor.

Evaluation Checkpoint: Did members communicate delays promptly? Were safety cables taped securely? Was the team log countersigned?

6. TRAINEE ASSESSMENT & EVALUATION RUBRIC

Evaluation Domain	Competent Standard (Pass)	Not Yet Competent
Role Recognition	Accurately defines individual and team scopes; follows reporting lines seamlessly.	Unclear on task limits; bypasses designated team leads.
Team Cooperation	Proactively aids teammates; accepts feedback; maintains constructive demeanor.	Works in isolation; refuses peer assistance; creates friction.
SOP Execution	All procedures adhere strictly to safety, time limits, and institutional reporting.	Violates safety protocols; submits incomplete shift records.
