TECHNICAL EDUCATION & SKILLS DEVELOPMENT FRAMEWORK

Module 4: Practicing Occupational Health and Safety Procedures

Unit Code: 500311108 **Nominal Duration:** 1.0 Hour **Level:** Basic Competency

1. UNIT DESCRIPTOR & LEARNING OUTCOMES

This module covers the knowledge, practical competencies, and workplace attitudes required to comply with regulatory standards and organizational Occupational Health and Safety (OHS) protocols. Trainees learn to identify hazards, assess risk severities, apply hierarchy controls, and maintain active safety preparedness.

Outcome 1 (LO1)
Identify physical, electrical, and ergonomic hazards, indicators, and organizational safety protocols.

Outcome 2 (LO2)
Evaluate hazards and risks based on Threshold Limit Values (TLV) and Philippine OHS legislative standards.

Outcome 3 (LO3)
Control hazards via safety codes, Clean Air Act, waste sorting, and correct Personal Protective Equipment (PPE).

Outcome 4 (LO4)
Maintain OHS awareness by executing emergency drills, filling health records, and servicing PPE gear.

2. HIERARCHY OF HAZARD CONTROL IN TECHNICAL WORKSTATIONS

3. PERFORMANCE CRITERIA MATRIX: HAZARD IDENTIFICATION & EVALUATION (LO1 & LO2)

Assessment Element	Performance Standards & Indicators	Assessment Method
Hazard Identification	Physical trip lines, exposed live wiring, excessive heat, and ergonomic workstation strains are identified and documented clearly.	Practical inspection & Written test
Threshold Limits (TLV)	Maximum exposure limits for monitor glare, thermal load, and continuous screen work are verified against Philippine OHS standards.	Simulation & Situation analysis
Contingency Planning	Emergency power shutoffs, evacuation routes, and first-aid kits are verified for immediate operational readiness.	Direct observation & Oral test

4. HAZARD MITIGATION, REGULATIONS & SAFETY AWARENESS (LO3 & LO4)

Operational health requires strict adherence to statutory safety frameworks, including the Fire and Electrical Safety Codes, the Clean Air Act, and ecological e-waste sorting protocols. Technicians must conduct structured emergency drills and maintain clean Personal Protective Equipment (PPE).

Compliance Focus	Mandatory Procedure & Standard	Verifiable Documentation
Electrical & Fire Safety	Ensure equipment is routed through surge protectors/AVRs; verify CO2/Dry Chemical fire extinguishers are charged and accessible.	Station electrical checklist
Waste Management	Segregate spent printer cartridges, damaged PCBs, and batteries according to RA 9003 and RA 6969 hazardous waste rules.	E-waste segregation manifest
PPE Maintenance	Inspect anti-static wrist straps, protective rubber gloves, and dust masks before starting hardware service procedures.	PPE condition service log
Drills & Health Records	Participate in scheduled earthquake/fire evacuation drills; maintain updated personal accident and medical records.	Emergency participation sheet

5. PRACTICAL LABORATORY ACTIVITY: COMPUTER WORKSTATION OHS AUDIT

> **Audit Scenario:** You are tasked with inspecting Computer Laboratory Bay B. Identify 3 critical safety discrepancies from the checklist below and record immediate corrective measures.

LABORATORY OHS INSPECTION CHECKLIST

[!] Physical / Electrical Check: Power cords trailing across main aisle; overloaded power strip driving 4 CPUs and 2 laser printers simultaneously.

[!] Ergonomic & Environmental Check: Display terminals set at improper viewing angle producing severe neck fatigue; blocked ventilation vents on CPU towers.

Immediate Remediation: Route cables through rubber floor bridges, redistribute electrical loads across separate breaker phases, and clean CPU air intake filters.

6. TRAINEE ASSESSMENT & EVALUATION RUBRIC

Evaluation Domain	Competent Standard (Pass)	Not Yet Competent
Hazard Detection	Rapidly spots electrical, fire, ergonomic, and chemical risks; interprets TLVs accurately.	Overlooks trailing cables or overloaded circuits.
Safety Control Execution	Applies proper engineering/admin controls; correctly wears and maintains PPE items.	Ignores grounding straps; bypasses protective gear.
Emergency Preparedness	Executes orderly drill actions; reports accidents promptly; maintains legible OHS forms.	Panics during drills; fails to record workplace incidents.
