COMPETENCY-BASED CURRICULUM FRAMEWORK • CORE COMPETENCIES

MODULE 8: USING E-MAIL & SEARCHING THE WEB USING BROWSERS

CBC-BCL-08
Rev. 00-
03/08/17

UNIT OF COMPETENCY
Use E-mail and Search the Web Using Browsers

NOMINAL DURATION
18 Hours (Modular / Hands-On)

PREREQUISITES
Operating a Personal Computer

Module Descriptor: This module defines the competency required to access and navigate the World Wide Web using browser applications, execute targeted search queries with advanced filters, create and manage electronic mail accounts, compose and transmit secure messages with attachments, manage address book directories, and organize email archives.

SUMMARY OF CORE LEARNING OUTCOMES:

LO 1
Access the Internet & Web

LO 2
Search Web & Manage Bookmarks

LO 3
Send & Organize Messages

LO 4
Create & Update Address Books

LO 1. ACCESS THE INTERNET

CORE LEARNING OUTCOME 1

ASSESSMENT CRITERIA	TECHNICAL CONTENTS	CONDITIONS & RESOURCES	METHODOLOGIES	ASSESSMENT
1. Browser Launch & Setup: Web browser opened and default home page set using Internet Options/Settings. **2. Interface Customization:** Browser display, zoom ratio, and toolbars configured to match individual workflow.	• Browser architecture & interface elements • Configuring default homepage & startup tabs • Customizing browser toolbars and extensions • Cache, cookies, and browsing privacy options	• PC with broadband connectivity • Modern browsers (Chrome, Edge, Firefox) • Institutional internet policy manual • Step-by-step setup guides	• Lecture-demonstration • Hands-on application • Self-paced tasks	• Direct observation • Practical demonstration • Computer-based test
3. URL Navigation: Uniform Resource Locators (URLs) typed correctly into address bar; domain extensions (.com, .gov, .edu, .org, .ph) identified.	• URL anatomy (Protocol, Domain, Path, Query) • HTTP vs. HTTPS security protocols • Addressing errors (404, DNS errors) • Autocomplete & browsing history navigation	• Workstation with active internet • URL target assignment sheet • Educational & government web portals	• Guided drill • Independent lab practice • Interactive review	• Performance testing • Direct questioning
4. Site Access & Data Retrieval: Target webpages accessed; text, reference images, and downloadable documentation retrieved and saved locally.	• Downloading files and verification • Safe downloading & malware awareness • Inspecting website security certificates	• Local storage folders • File verification checklists • Trainee lab workstations	• Problem-solving task • Hands-on download exercise	• File audit • Direct observation

LO 2. SEARCH THE INTERNET

CORE LEARNING OUTCOME 2

ASSESSMENT CRITERIA	TECHNICAL CONTENTS	CONDITIONS & RESOURCES	METHODOLOGIES	ASSESSMENT
1. Search Engine Utilization: Major search engines (Google, Bing) located and queried using clear, targeted search terms and phrases.	• Types of search engines & web crawlers • Keyword formulation techniques • Evaluating search result rankings	• Internet-connected workstations • Information search task cards • Search engine platforms	• Lecture-demonstration • Hands-on search drill • Discussion	• Direct observation • Computer-based exam • Practical demonstration
2. Advanced Search Expressions: Boolean operators (AND, OR, NOT), quotation marks, site filters (site:.gov.ph), and filetype filters (filetype:pdf) applied.	• Boolean logic in internet search • Search syntax modifiers (-, quotation marks, site:) • Information credibility and fact-checking	• Research prompt worksheets • Academic & technical query samples • Search syntax quick-reference sheet	• Guided research practice • Individual laboratory work	• Search accuracy rubric • Skill demonstration
3. Bookmark & Favorites Management: Favorite sites bookmarked, organized into categorical folders, and exported/imported across browsers.	• Creating and naming bookmarks/favorites • Managing bookmark subfolders • Exporting and importing HTML bookmarks	• Browser bookmark toolbar • List of target resource URLs • Folder structuring instructions	• Demonstration • Hands-on exercises	• Bookmark structure audit • Oral questioning
4. Webpage Printing & Saving: Webpages formatted for print output or saved as complete HTML archives / PDF documents per user requirements.	• Print dialog options (Headers, Backgrounds) • Save As formats (Single File MHTML, HTML Only) • Saving online pages directly to PDF	• Workstation with printer setup • Digital storage drives • Model research articles	• Practical exercise • Self-paced tutorial	• Output inspection • Direct observation

Source Credibility & Digital Safety: Trainees must be taught to verify sources by evaluating domain authority (.edu, .gov, official portals), inspecting author credentials, and checking publication recency before integrating internet search findings into professional workplace reports.

✓ Boolean Search (AND / OR) ✓ Site Operator (site:gov.ph) ✓ Filetype Filter (filetype:pdf) ✓ Bookmark Hierarchy ✓ Web-to-PDF Archival

LO 3. SEND AND ORGANIZE MESSAGES

CORE LEARNING OUTCOME 3 (PART 1)

ASSESSMENT CRITERIA	TECHNICAL CONTENTS	CONDITIONS & RESOURCES	METHODOLOGIES	ASSESSMENT
1. Account Access & Composition: Mail client opened; new email composed with valid recipient address, informative subject line, and structured body text.	• Email structure (Username, Domain, @ symbol) • Subject line clarity & email netiquette • Salutations, body formatting, and sign-offs	• Webmail / mail client software • Workstation with internet • Standard email scenario briefs	• Lecture-demonstration • Hands-on application	• Direct observation • Practical demonstration
2. Recipient Addressing: Proper usage of To, Carbon Copy (CC), and Blind Carbon Copy (BCC) demonstrated according to workplace privacy rules.	• Purpose and workplace etiquette of CC • BCC privacy protection guidelines • Reply vs. Reply All precautions	• Sample multi-party memos • Distribution scenarios • Workplace communication rules	• Guided drill • Case scenario review	• Skills assessment • Oral questioning
3. Attachments & Signatures: Single and multiple files attached safely; automatic professional user signature created and automatically appended.	• Attaching files & file size limits • Dangerous file extensions (.exe, .bat, .vbs) • Automated signature blocks with contact details	• Document and image test files • Corporate signature templates • Webmail accounts	• Step-by-step walkthrough • Individual laboratory work	• Attachment verification • Direct observation
4. Message Delivery & Priority: Message priorities (High, Normal, Low) assigned; delivery read receipts requested and messages dispatched successfully.	• Flagging high-importance messages • Delivery receipts and read status • Outbox vs. Sent Items queue verification	• Practice email test accounts • Instructor feedback terminal • Workstation terminal	• Hands-on exercises • Simulation drill	• Verification test • Computer exam
5. Inbox Handling & Security: Incoming emails opened; safe attachment preview executed; phishing, spam, and suspicious senders identified and isolated.	• Downloading attachments safely • Identifying phishing lures & spoofed senders • Marking spam and blocking junk senders	• Sample phishing simulation emails • Safe sandbox mail accounts • Cyber safety checklists	• Interactive discussion • Threat identification drill	• Practical evaluation • Situational analysis

Cybersecurity Alert — Email Attachments: Trainees must never open unexpected attachments with executable extensions or macro-enabled documents from unknown senders. Always inspect sender domains and verify requests through alternate communication channels before downloading files.

LO 3 (CONT.). ORGANIZE AND ARCHIVE EMAIL MESSAGES

CORE LEARNING OUTCOME 3 (PART 2)

ASSESSMENT CRITERIA	TECHNICAL CONTENTS	CONDITIONS & RESOURCES	METHODOLOGIES	ASSESSMENT
1. Search, Sort & Filter: Inbox sorted by date, sender name, subject, or size; search filters executed to locate specific archived correspondence.	• Sorting by columns (From, Date, Subject, Size) • Search operators in email (from:, has:attachment) • Color categories and follow-up flags	• Pre-populated mailbox datasets • Workstation with email client • Search assignment sheets	• Demonstration • Practical lab exercise	• Timed lookup test • Direct observation
2. Folder Creation & Rules: Custom mail folders and subdirectories created; manual and automated rules applied to categorize and archive messages.	• Creating hierarchical email folders • Drag-and-drop archiving • Automated inbox routing rules & filters	• Institutional folder filing rubric • Active email accounts • Step-by-step guides	• Guided simulation • Independent practice	• Folder structure audit • Skills demonstration

LO 4. CREATE AND MANAGE AN ADDRESS BOOK

CORE LEARNING OUTCOME 4

ASSESSMENT CRITERIA	TECHNICAL CONTENTS	CONDITIONS & RESOURCES	METHODOLOGIES	ASSESSMENT
1. Contact Creation: Individual contacts created with complete names, email addresses, phone numbers, and organizational job titles.	• Address book interface & contact fields • Creating and editing individual contacts • Extracting contact details from incoming emails	• Workstations with contact manager • Employee contact rosters • Practice contact records	• Lecture-demonstration • Hands-on practice	• Direct observation • Practical demonstration
2. Contact Groups & Lists: Distribution lists / contact groups formed for teams or departments; group memberships updated as required.	• Creating contact groups / distribution lists • Adding, editing, and deleting group members • Exporting/importing contacts (.csv / vCard)	• Departmental grouping scenarios • CSV contact roster files • Reference guides	• Group exercises • Self-paced tasks	• Skills test • Output check
3. Group Broadcast Messaging: Group distribution lists populated into message recipient fields to dispatch team announcements smoothly.	• Addressing messages using distribution groups • Expanding distribution lists vs. collapsed mode • Avoiding broadcast notification spam	• Functional email test accounts • Sample broadcast memo tasks • Communication guide	• Hands-on drill • Interactive demonstration	• Practical test • Direct observation

RECOMMENDED MODULE RESOURCES & EQUIPMENT (CLASS OF 30 TRAINEES)

WORKSTATION & CONNECTIVITY	SOFTWARE & ACCOUNTS	REFERENCE & SUPPLIES
• 30 PC Workstations (Core i3 / 8GB RAM) • High-speed broadband LAN / Wi-Fi (100+ Mbps) • Network router, firewall & switch • 1 Instructor presentation display	• Modern browsers (Chrome, Edge, Firefox) • Dedicated trainee email accounts • Email client (Outlook, Thunderbird, Webmail) • Contact roster import data files	• Internet safety & netiquette handbook • Search syntax quick-reference cards • Trainee Competency Logbooks • A4 bond paper & printer access

Institutional Sign-Off & Competency Certification: Trainees must achieve satisfactory marks across all 4 learning outcomes to certify industry-standard competence in professional email correspondence, digital safety, and web research under TESDA Basic Computer Literacy standards.
