MODULE 10: OPERATING A PRESENTATION PACKAGE

CBC-BCL-10
Rev. 00-03/08/17

UNIT OF COMPETENCY
Operate a Presentation Package

NOMINAL DURATION
18 Hours (Modular / Hands-On)

PREREQUISITES
Word Processing, E-mail & Web Browsing

Module Descriptor: This module defines the competency required to operate presentation applications (such as Microsoft PowerPoint / LibreOffice Impress) to perform professional slide production. It encompasses creating slide decks, utilizing design templates, customizing workspace settings, incorporating rich graphic objects and media, configuring transition/animation timings, and printing presentations, handouts, and speaker notes.

SUMMARY OF CORE LEARNING OUTCOMES:

LO 1	LO 2	LO 3	LO 4	LO 5
Create Presentations	Customize Settings	Format Presentation	Slide Show Effects	Print Slides & Notes

LO 1. CREATE PRESENTATIONS

CORE LEARNING OUTCOME 1

ASSESSMENT CRITERIA	TECHNICAL CONTENTS	CONDITIONS & RESOURCES	METHODOLOGIES	ASSESSMENT
1. Presentation Conception: Simple, professional slide designs created according to organizational branding guidelines and requirements.	• Presentation software workspace & ribbons • Slide dimensions: Widescreen (16:9) vs. Standard (4:3) • Working with blank decks vs. pre-designed themes • Organizational branding and visual hierarchy	• Workstations with presentation software • Corporate style guide / policy brief • Pre-loaded design themes • Training activity task cards	• Lecture-demonstration • Hands-on application • Self-paced tasks	• Computer-based test • Direct observation • Practical demonstration
2. Text & Symbol Insertion: Slide headings, bulleted body text, special symbols, and equation objects populated accurately onto blank slides.	• Text box insertion and boundary controls • Inserting special symbols & copyright marks • Slide title placeholders and content bounding boxes • Clear text readability guidelines (6×6 rule)	• Presentation package terminal • Unformatted script outlines • Symbol insertion reference cards	• Guided drill • Individual laboratory work • Interactive review	• Direct observation • Practical performance test • Content audit
3. Template Application & Storage: Pre-built design templates loaded and edited; presentation decks saved in required folder directories, formats, or slide-show files.	• Browsing and downloading design templates • File formats (.pptx, .ppt, .potx, .ppsx, .pdf) • Saving to local drives, external media, or cloud • Document auto-recovery settings	• Local disk & USB Flash drive • Template sample library • Standard file naming rubric	• Demonstration • Hands-on task simulation	• File inspection • Oral questioning

LO 2. CUSTOMIZE BASIC SETTINGS

CORE LEARNING OUTCOME 2

ASSESSMENT CRITERIA	TECHNICAL CONTENTS	CONDITIONS & RESOURCES	METHODOLOGIES	ASSESSMENT
1. Workspace Views & Toolbars: Normal, Slide Sorter, Reading View, and Slide Master views accessed; toolbars and Quick Access customized.	• View switcher: Normal, Sorter, Notes, Reading • Slide Master interface & master layout hierarchy • Customizing Quick Access Toolbar & ribbon tabs • Rulers, gridlines, and alignment guides	• Workstations with presentation app • Multi-slide practice decks • View mode reference sheets	• Lecture-demonstration • Hands-on exploration • Discussion	• Direct observation • Practical demonstration • Oral questioning
2. Slide Layouts & Structure: Pre-set slide layouts (Title, Content, Two Content, Comparison) selected, modified, and reorganized smoothly.	• Selecting slide layouts from layout gallery • Rearranging slide order via thumbnail pane • Duplicating, hiding, and deleting slides • Creating sections to organize large slide decks	• Slide deck outline files • Task assignment sheets • Workstation terminals	• Guided exercises • Hands-on laboratory drill	• Structure audit • Skill rubric check
3. Color Schemes & Backgrounds: Background styles (solid, gradient, texture) customized; coordinated color palettes and theme fonts applied globally.	• Format Background pane controls • Theme color palettes & accent contrast • Font pairing (Heading font + Body font) • Apply to All vs. Apply to Selected Slides	• Brand color swatches (Hex/RGB) • Background graphic assets • Model corporate slide decks	• Step-by-step walkthrough • Individual laboratory work	• Visual appeal evaluation • Practical performance

LO 3. FORMAT PRESENTATION (PART 1: CHARTS & GRAPHICS)

CORE LEARNING OUTCOME 3

ASSESSMENT CRITERIA	TECHNICAL CONTENTS	CONDITIONS & RESOURCES	METHODOLOGIES	ASSESSMENT
1. Charts & Data Displays: Column, Bar, and Pie charts inserted from data tables; chart titles, legends, and data labels styled cleanly.	• Inserting charts linked to embedded spreadsheets • Modifying chart types and styling presets • Editing chart data values and series labels • Contrast optimization for projector visibility	• Raw tabular data files • Chart design specification guide • Presentation software suite	• Demonstration • Hands-on application	• Skill test • Direct observation
2. Tables & SmartArt Diagrams: Data tables formatted with contrasting header rows; SmartArt process/hierarchy diagrams created and styled.	• Table creation, cell padding, and grid borders • SmartArt graphics: Process, Cycle, Hierarchy • Converting bulleted lists directly to SmartArt • Color schemes and 3D bevel effect constraints	• Text outlines of workflows • Organizational hierarchy data • Practice slide templates	• Guided drill • Self-paced modules	• Output check • Practical demonstration

Slide Master Consistency: Trainees must utilize the Slide Master to establish global design elements—such as institutional logos, slide numbering, and standardized typography—rather than pasting logos manually across individual slides.

LO 3 (CONT.). FORMAT PRESENTATION (PART 2: MEDIA & OBJECTS)

CORE LEARNING OUTCOME 3

ASSESSMENT CRITERIA	TECHNICAL CONTENTS	CONDITIONS & RESOURCES	METHODOLOGIES	ASSESSMENT
1. Picture Handling & Cropping: High-resolution photos inserted, proportionally resized, cropped to aspect ratio/shape, and compressed to reduce file size.	• Inserting pictures from local device drives • Picture styles, borders, and artistic effects • Cropping to standard dimensions and shapes • Picture compression for web and email distribution	• Image practice asset repository • Presentation software terminal • Image formatting criteria card	• Demonstration • Hands-on exercises	• Direct observation • Image quality inspection
2. Audio & Video Media Insertion: Video clips and background audio inserted into slides; playback triggers and trim options configured properly.	• Supported video formats (.mp4) and audio (.mp3) • Video playback controls: On Click vs. Automatically • Trimming video/audio clips inside presentation app • Video styles, poster frames, and playback looping	• Sample multimedia audio/video clips • Audio headphones / workstation speakers • Instructional guide sheets	• Guided demonstration • Individual laboratory drill	• Practical demonstration • Performance test

LO 4. ADD SLIDE SHOW EFFECTS

CORE LEARNING OUTCOME 4

ASSESSMENT CRITERIA	TECHNICAL CONTENTS	CONDITIONS & RESOURCES	METHODOLOGIES	ASSESSMENT
1. Slide Transitions & Timing: Professional slide transitions applied consistently; duration, sound effects, and advance timings configured.	• Transitions gallery (Fade, Push, Wipe) • Transition duration controls & sound triggers • Advance Slide options: On Mouse Click vs. After [X] sec • Apply to All transitions best practices	• Multi-slide project decks • Transition timing task sheets • Presentation terminal	• Lecture-demonstration • Hands-on practice • Self-paced tasks	• Skills test • Direct observation • Computer exam
2. Object Animations & Motion: Entrance, Emphasis, and Exit animations assigned to bullet points and graphics; Animation Pane sequencing verified.	• Animation categories: Entrance, Emphasis, Exit • Effect options & sequence (by paragraph/level) • Animation Pane: Start On Click, With Previous, After Previous • Motion paths and duration adjustments	• Animated slide exercise templates • Animation storyboard cards • Workstations with software	• Step-by-step walkthrough • Guided drill	• Animation timing audit • Practical performance
3. Slide Show Navigation & Tools: Full-screen Slide Show delivered using Presenter View, action buttons, hyperlinks, and laser pointer annotation tools.	• Presenter View on dual displays (Slide + Notes) • Keyboard shortcuts during show (B=Black, W=White) • Action buttons and slide-to-slide hyperlinks • Pen, highlighter, and screen drawing annotations	• Dual-monitor PC setup or projector • Presentation remote / clicker • Model presentation decks	• Live presentation simulation • Interactive rehearsal	• Practical demonstration • Rubric assessment

Animation Restraint Principle: Avoid excessive, jarring animations (such as bounce, spin, or explosive entrances) in professional environments. Use subtle transitions like Fade or Wipe to maintain focus on the message rather than distracting visual gimmicks.

✓ Slide Transitions ✓ Animation Pane ✓ Presenter View ✓ Video Embedding ✓ Action Buttons

LO 5. PRINT PRESENTATIONS AND NOTES

CORE LEARNING OUTCOME 5

ASSESSMENT CRITERIA	TECHNICAL CONTENTS	CONDITIONS & RESOURCES	METHODOLOGIES	ASSESSMENT
1. Print Layout Selection: Appropriate print outputs selected: Full Page Slides, Notes Pages (slide + speaker notes), or Outline View.	• Print Layout modes: Slides, Notes Pages, Outline • Generating speaker notes below slide canvas • Formatting Outline view text for quick review • Frame slides option and high-quality graphics setting	• Completed decks with speaker notes • Workstations with printer drivers • Printing assignment sheets	• Lecture-demonstration • Hands-on laboratory drill	• Practical demonstration • Direct observation
2. Audience Handout Setup: Handout layouts configured for 2, 3 (with note lines), 4, 6, or 9 slides per page in portrait or landscape orientation.	• Handout layout options (1, 2, 3, 4, 6, 9 per page) • The 3-slides-per-page format with ruled lines • Header & Footer for handouts (Date, Page numbers) • Slide order: Horizontal vs. Vertical progression	• Handout specification rubrics • Presentation software suite • Standard bond paper	• Guided drill • Individual practice drill	• Layout inspection • Output check
3. Color Options & Export: Output mode set to Color, Grayscale, or Pure Black & White to conserve consumables; slides exported cleanly to PDF.	• Color vs. Grayscale vs. Pure Black & White • Print range selection (All, Selection, Custom Range) • Exporting decks to handout-formatted PDF files • Submitting printed materials to evaluator	• Local / network laser printer • Bond paper supplies • Completed student decks	• Hands-on printing drill • Submission and peer review	• Printed product audit • Competency verification

RECOMMENDED MODULE RESOURCES & EQUIPMENT (CLASS OF 30 TRAINEES)

HARDWARE & EQUIPMENT	SOFTWARE & DIGITAL MATERIALS	SUPPLIES & REFERENCE ITEMS
• 30 PC Workstations (Core i3 / 8GB RAM) • 1 Multimedia Digital Projector / 65" Interactive Screen • 1 Wireless Presenter Remote / Laser Pointer • 1 Network Color Laser Printer	• Licensed Presentation Suite (MS PowerPoint / Impress) • Corporate design template repositories • Royalty-free image, audio & video sample packs	• Letter & A4 White Bond Paper (70–80 gsm) • Visual presentation design reference manuals • Trainee Competency Progress Logbooks • Printer toner cartridges

Institutional Sign-Off & Competency Certification: Trainees must demonstrate independent mastery across all 5 learning outcomes to earn certified competence in multimedia slide deck production, live presentation delivery, and handout publishing under TESDA Basic Computer Literacy standards.
